```java
public class TwoDArrays {

        public static void main(String[] args) {
                int arr[][] = new int[3][5];
                System.out.println(arr[0]);
                //System.out.println(arr[0]);
                System.out.println(arr[0][0]);

                int arr2[][] = new int[4][];
                System.out.println(arr2);
                //System.out.println(arr2[0]);
        //      System.out.println(arr2[0][0]);
                for(int i = 0; i < arr2.length; i++){
                        arr2[i] = new int[i + 2];
                }

                for(int i = 0; i < arr2.length; i++){
                        for(int j = 0; j < arr2[i].length; j++){
                                System.out.print(arr2[i][j] +" ");
                        }
                        System.out.println();
                }

        }

}
```
